Screen-free game kit · Design; not tested in practice

Planning My Plate

Learning goal

Take a little first and add more if needed; compare edible food left on plates using sample data. Nobody is rewarded for eating less or for finishing the plate. This version needs no tasting.

Materials

The card pages of this PDF (A4, 100% scale), scissors, pencils; box labels go on the table.

How to play

- No time limit; nobody is rushed.
- A wrong answer costs nothing: read why, then try again.
- A team that wants help turns over İKO's hint card.
- At the end, say what you learned in one sentence and choose the real-life task.

Task flow

Ages 7–9

We will serve apple to four guests. Choose the best plan for each guest.

1. Guest 1 is very hungry and loves apples.
2. Guest 3 has just eaten and is full.
3. Guest 2 will try apple for the first time and is not sure.
4. "The apple smells nice, so it is safe to eat." Is that right?

Ages 10–12

Compare two portion conditions with sample records: Standard (4 slices for everyone) and Small + extra (2 slices first, 2 more on request).

1. In the Standard condition, how many grams of edible apple were left per person?
2. In the same sample data, which condition left less edible apple per person?
3. Who counts in the denominator? Choose all.
4. In one team, nobody was served apple. What is written for g/person?
5. Who should be rewarded?

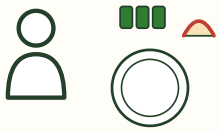

Real-life task: At home, take a small portion first at one meal; add more if needed. Note whether anything edible was left on your plate. No need to weigh it.

If a badge is used, it only shows the task was finished; it is not proof of learning.

Planning My Plate · Ages 7–9 · ✂ Cut along the dashed line · card 95 × 86 mm

Ages 7–9 · Question card

Guest 1 is very hungry and loves apples.

A. Give 2 slices and say "You can have 2 more if you like."

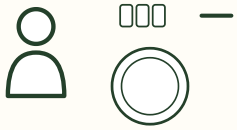

B. Give none; they eat a lot anyway.

Ages 7–9 · Hint

Give a little first and say they can have more.

Ages 7–9 · Question card

Guest 3 has just eaten and is full.

A. Ask: 1 slice if they want, none if not.

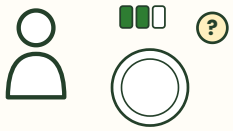

B. Give 4 slices and ask them to finish.

Ages 7–9 · Hint

How much does a full person need? Asking helps.

Ages 7–9 · Question card

Guest 2 will try apple for the first time and is not sure.

A. Start with a small slice; take more if they like it.

B. Give a big plate; they will try it anyway.

Ages 7–9 · Hint

Starting small makes trying something new easier.

Planning My Plate · Ages 7–9 · ✂ Cut along the dashed line · card 95 × 86 mm

Ages 7–9 · Question card

“The apple smells nice, so it is safe to eat.” Is that right?

A. No. Cleanliness, correct storage and adults’ checks make food safe.

B. Yes, anything that smells nice is safe.

Ages 7–9 · Hint

Who checks safety, and how?

Planning My Plate · Ages 10–12 · ✂ Cut along the dashed line · card 95 × 86 mm

Ages 10–12 · Question card

In the Standard condition, how many grams of edible apple were left per person?

SAMPLE DATA — not a measurement from a real place

Condition	People served apple	Total edible leftovers (g)
Standard	10	300
Small + extra	10	180

A. 30 g/person

B. 300 g/person

C. 10 g/person

Ages 10–12 · Hint

Divide the total leftovers by the number of people served apple.

Ages 10–12 · Question card

In the same sample data, which condition left less edible apple per person?

A. Small + extra (18 g/person)

B. Standard (30 g/person)

Ages 10–12 · Hint

Small + extra: 180 ÷ 10.

Ages 10–12 · Question card · ☐☐

Who counts in the denominator? Choose all.

A. A person served apple who ate it all

B. A person served apple who ate none

C. A person who took carrot instead of apple

D. A person who was not served apple at the portion stage

Ages 10–12 · Hint

Denominator: people who were served apple at the portion stage.

Planning My Plate · Ages 10–12 · ✂ Cut along the dashed line · card 95 × 86 mm

Ages 10–12 · Question card

In one team, nobody was served apple. What is written for g/person?

A. “Cannot be calculated”

B. 0 g/person

Ages 10–12 · Hint

Can you divide by zero?

Ages 10–12 · Question card

Who should be rewarded?

A. Nobody is rewarded for how much they eat; the aim is to take according to need.

B. Whoever finishes the plate fastest.

C. Whoever eats the least.

Ages 10–12 · Hint

The aim is to take according to need.

Answers and explanations (teacher only)

Ages 7–9

1A	Give 2 slices and say "You can have 2 more if you like."	Fits	Because they are hungry, the right to more matters.
1B	Give none; they eat a lot anyway.	Does not fit	A hungry person's need should be met.
2A	Ask: 1 slice if they want, none if not.	Fits	Serving according to need reduces leftovers.
2B	Give 4 slices and ask them to finish.	Does not fit	Forcing someone to finish the plate is not right; 4 slices may be too much for a full person.
3A	Start with a small slice; take more if they like it.	Fits	If they do not like it, little is left; if they do, they add more.
3B	Give a big plate; they will try it anyway.	Does not fit	If they do not like it, a lot may be left on the plate.
4A	No. Cleanliness, correct storage and adults' checks make food safe.	Fits	Smell and taste are not safety tests. The key steps of food safety are described by WHO (K15).
4B	Yes, anything that smells nice is safe.	Does not fit	A nice smell does not show safety.

Ages 10–12

1A	30 g/person	Fits	300 ÷ 10 = 30.
1B	300 g/person	Does not fit	That is the total; you did not divide by the number of people.
1C	10 g/person	Does not fit	10 is the number of people, not leftovers.
2A	Small + extra (18 g/person)	Fits	18 < 30. These are only sample data; class data may differ.
2B	Standard (30 g/person)	Does not fit	30 g is more than 18 g.
3A	A person served apple who ate it all	Fits	Counts.
3B	A person served apple who ate none	Fits	Counts; all their slices are added to the leftovers.
3C	A person who took carrot instead of apple	Does not fit	Does not count; carrot leftovers are recorded separately.
3D	A person who was not served apple at the portion stage	Does not fit	Does not count.
4A	"Cannot be calculated"	Fits	The denominator is 0, so no division is made.

4B	0 g/person	Does not fit	Writing 0 reads as “no leftovers”, but no calculation was possible.
5A	Nobody is rewarded for how much they eat; the aim is to take according to need.	Fits	Right. Neither eating less nor forcing the plate empty is rewarded.
5B	Whoever finishes the plate fastest.	Does not fit	Speed and forced finishing are not healthy goals.
5C	Whoever eats the least.	Does not fit	Eating less is not rewarded; needs must be met.

Planning My Plate: Taking a little first and adding more when wanted makes it easier to eat as much as you need. Smell and taste do not show safety; cleanliness, correct storage and adults’ checks do.
